

LAKE PROMO

2004 - 2007

LakePromo –Tools for water management and restoration processes 2004 - 2007

OBJECTIVES

Lakepromo aims

- to promote multilevel and interregional co-operation in the field of water management.
- to pool the related know-how and technology and to find the best available practices for different water restoration targets
- to increase public awareness and participation in water management processes.
- to contribute to the objectives of the European Water Framework Directive: a good ecological and chemical status of all surface waters in Europe.

CENTRAL OUTPUTS

- Country-specific information packages on lake / wetland management and restoration procedures will be published both in pdf and printed versions.
- For pilot water areas, best practices for water restoration are formulated and tested in co-operation with the international project group as well as the local stakeholders.
- Meetings and seminars on related topics will be arranged in each partner country.
- Plan for continuity.

FINANCING

The Lakepromo-operation is part-financed by the European Union (European Regional Development Fund) within the INTERREG III C Programme. All the project partners will participate in this operation by their own co-financing. The total budget of the project (during 2004 – 2007) is estimated to be 1, 47 m€.

PARTNERS

Finland:

The Municipal Federation of Savonia Polytechnic (Lead Partner)
Finnish Environment Institute, The City of Kuopio,
North Savo Regional Environment Centre

Denmark:

The County of North Jutland

United Kingdom:

University of Brighton

Spain:

Municipality of Roquetas de Mar

Estonia:

Estonian University of Life Sciences

Germany:

Brandenburg University of Technology
The Federal Environmental Agency

Hungary:

University of Debrecen, Centre for Environmental Management and Policy

Russia:

Northern Water Problems Institute of Karelian Research Center, Russian Academy of Sciences
